Zhejiang Jinko Energy Storage Co., Ltd

Traceability Capability Assessment Summary

TÜV SÜD was engaged by Zhejiang Jinko Energy Storage Co., Ltd (hereinafter referred to as Jinko Energy Storage) to perform Traceability Capability Assessment from Oct. 10 to Oct. 11, 2025, in Jinko Energy Storage.

Company Name	Address	Assessment Date
Zhejiang Jinko Energy Storage Co., Ltd	No.8 Xiangxin Road, Huangwan Town, Haining City, Jiaxing City, Zhejiang Province, China	Oct 10-11, 2025

The Traceability Capability Assessment was conducted to evaluate Jinko Energy Storage's current traceability status. Through this assessment, the company aims to drive continuous improvement, ultimately achieving traceability of critical raw materials and enhanced supply chain transparency management. The assessment is reference to ISO 22095:2020 and REGULATION (EU) 2023/1542 Article 49 (d).

The assessment activities included:

- Jinko Energy Storage traceability management system audit.
- On-site traceability verification from incoming materials to finished products (Factory warehouses and workshops visits).
- Random sample checks were conducted on products' traceability:
  During the traceability audit conducted by TÜV SÜD, one representative Energy Storage System (ESS) product and one Cell product were selected for comprehensive evaluation. The verification process encompassed a detailed review of key documentation, including warehouse records, production records, and transaction records. Additionally, supporting evidence documents were examined, as provided by the Quality Management Department, Supply Chain Management Department, Operational Management Department, and upstream suppliers. This systematic review confirmed the integrity and compliance of the traceability system under assessment.

Jinko Energy Storage has demonstrated a strong and effective internal traceability capability. The company possesses a well-documented system, trained staff, and integrated IT, which reliably tracks materials from raw materials receipt to finished product shipment.

Jinko Energy Storage has shown a positive attitude towards compliance and continuous improvement. Jinko Energy Storage is well-positioned to enhance its supply chain resilience, meet regulatory demands, and build a sustainable, transparent, and trusted supply chain.

About TÜV SÜD
*"**Add value. Inspire trust**." Since it was established more than 150 years ago, TÜV SÜD has been guided by this purpose: to make progress [illegible] by protecting people, the environment and assets from technology-related risks. More than 26,000 employees at over 1,000 locations in around 50 countries around the world work to provide safety, security, sustainability and added value for our customers. We are a technical service provider operating in the global TIC (Testing, Inspection, Certification) market, a growth [illegible] with an estimated volume of around € 80 billion. Our range of services covers product certification and testing, inspection, auditing and system certification, technical advisory services and training.*
